## OBJECTIVE

---

An ambitious and dedicated individual looking forward to improve my education, put my skills to test and gain exposure

## EDUCATION

---

- **BMS COLLEGE OF ENGINEERING** *Bengaluru, Karnataka*  
Bachelor of Engineering in Electronics and Telecommunication  
**Current CGPA: 7.11/10**
- **SARDAR PATEL PUBLIC SCHOOL** *Bhopal, Madhya Pradesh*  
*AISSCE(Class XII)*

## PROJECTS

---

**OneClick** [↗](#) | *ReactJs, TailwindCSS, JavaScript* Apr 2024 - ongoing

- This is a user authenticated e-commerce website for budding sellers to expand their business.
- The front-end of this project has been made such that the user experience is smooth and the navigation is easy.
- The backend of this project is still in progress. It will have REST Api calls made for every action by the user.

**EasyPay** [↗](#) | *ReactJs, TailwindCSS, JavaScript, Express.js, MongoDB, JWT* Apr 2024 - Apr 2024

- This project is a web application enabling user authentication, sign-in, and money transfers among users. It has a dynamic dashboard which displays account information about the user.
- Real-time Updates: It facilitates real-time balance updates post-transaction, ensuring accurate and up-to-date account information for all users.

**Youtube Front Page Clone** [↗](#) | *ReactJs, Tailwind, TypeScript* Mar 2024 - Mar 2024

- This project is a clone of YouTube that aims to replicate the core features and functionalities of YouTube, such as browsing videos, searching, and playing videos.
- React: Used for building the user interface & Tailwind CSS: Utilized for styling the components and creating a modern UI.
- TypeScript: Enhances code quality and provides better developer experience with static typing.

**SKIN CANCER PREDICTION USING CNN** | *Python, OpenCv, Deep Learning* April 2023 - June 2023

- Designed a multiclass classification model using Convolutional Neural Networks (CNN) in TensorFlow, the purpose of the model is to accurately detect melanoma, a type of skin cancer
- The model was trained on a dataset containing labeled images of melanoma and non-melanoma cases, the CNN architecture was employed to extract features from the images and classify them into different classes

## TECHNICAL SKILLS

---

**Languages:** C++, JavaScript, HTML, CSS, TypeScript

**Libraries & FrameWorks:** React.js, Next.js, TailwindCSS, Node.js, Express.js, EJS, jQuery, Bootstrap, RESTful API, ORMs

**Databases & Tools:** SQL, MongoDB, PostgreSQL, Git, Prisma, Docker

**Relevant Courses:** Data Structures and Algorithms, OOPs, Operating Systems, Machine Learning, Deep Learning, Computer Networks, DBMS, Network Security

## STRENGTHS

---

- Analytical and strategic thinker, Quick learner, Good communicator, Creative, Debugging, Flexible, Team-oriented, Reliable.

## ROLES OF RESPONSIBILITY

---

- **President of technical club CodeLocked**
- **Event Coordinator** for events like Tecathalon, Shatranj
- **Coordinator and Member of the Organising Committee** for College fest
